HOW TO USE THIS FILE

- Organisations below are **categories and examples**, not confirmed leads. Each must be checked for current status, the right department and the decision-maker before any outreach.
- No individual names or contact details are included. Those are to be sourced and verified (company website, MCA filings, LinkedIn, association directories).
- Route in through an introduction wherever possible: Vivek Patel's top-level contacts first, then Vahid Bhai for the Home Agri and trade relationships.
- Prefer buyers who can transact under **existing** import and trade rules, so no policy change is needed.

- Importer-Exporter Code (IEC); GST registration; phytosanitary certificate for origin; FSSAI requirements if for food use; quality and GMO declarations for soya.
- Letter of credit route and port clearance at the chosen port (Kandla, Mundra, Pipavav, Mumbai).

D. NEXT STEPS FOR THE TEAM

- Vivek Patel to confirm the commodity list and any named institutional contacts (Monday, 2 Nov 2026, inferred).
- Team to verify each organisation above and add decision-maker names, using public sources only.
- Vahid Bhai to coordinate introductions and the Home Agri route.

This file lists categories and public examples to start the search. It is not a confirmed contact list. Verify every organisation and person before outreach.
